Platforms & Tools: HubSpot, Oracle Responsys, Acoustic, Cordial, Figma, Photoshop, Illustrator, JavaScript, jQuery, REST API Integrations, Git

PROFESSIONAL EXPERIENCE

Lead Email Developer

Snow Companies | October 2021 - Present

- Own end-to-end execution of Salesforce Marketing Cloud email programs, from technical requirements through deployment, QA, and post-send reporting.
- Architect Journey Builder lifecycle and triggered messaging supporting onboarding, engagement, and retention across multiple concurrent programs.
- Write SQL audience queries and manage Data Extensions to power segmentation for personalized, data-driven customer messaging.
- Run A/B tests on subject lines, creative, and send timing; report results to stakeholders and apply findings to improve open, click, and conversion performance.
- Troubleshoot complex SFMC issues spanning AMPscript, dynamic content, segmentation, and Journey Builder execution, and lead pre-deployment QA in Litmus.
- Partner with marketing, CRM, analytics, and creative stakeholders to align execution with audience strategy, brand standards, and technical constraints.
- Maintain documentation and reusable production libraries that keep campaign builds consistent and repeatable across the team.

Web & Email Developer

Socius Marketing | January 2021 - October 2021

- Produced high-volume responsive email campaigns for multiple concurrent client accounts under recurring weekly deadlines.
- Built a reusable template library that shortened production time per campaign and standardized cross-client compatibility and mobile responsiveness.
- Managed campaign QA in Litmus, including rendering and accessibility checks, before every deployment.

- Tracked campaign performance and reported results to marketing and analytics teams to guide ongoing template and content improvements.

Email Developer (Contract & Freelance)
Independent | January 2019 - January 2021

- Delivered promotional, lifecycle, and transactional campaigns across multiple ESPs, including HubSpot, Oracle Responsys, Acoustic, and Cordial.
- Implemented dynamic personalization, modular components, animation, and dark mode support in production email builds.
- Partnered directly with designers to translate Figma and Photoshop creative into pixel-accurate, production-ready campaigns.
- Standardized templates and QA workflows across accounts, reducing average campaign turnaround time.
